

University of British Columbia, Vancouver

Department of Computer Science

CPSC 304 Project Cover Page

Milestone #: 4

Date: Apr 1, 2024

Group Number: 50

Name	Student Number	CS Alias	E-mail Address
Romina Mahinpei	39405501	g3m4h	mahinpei@student.ubc.ca
Annie Wang	47832274	g4m0w	anniew02@student.ubc.ca
Sohbat Sandhu	79661179	n4c2w	sohbat@student.ubc.ca

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Final Project Summary

Our final application provides an engaging online environment that **allows users to comprehensively learn new languages** with fellow passionate learners while being assisted by various learning resources. Our focus extends beyond mere language acquisition - we strive to facilitate a comprehensive language learning journey. Given this high-level goal, we provide our users with the opportunity to consult experts specializing in various languages, participate in interactive forums, complete practice exercises, and use various learning resources/materials.

General Changes & Schema Changes

- Renamed the Score attribute to Points in Exercise4 and also changed its data type from REAL to INTEGER for easier interpretability for the points system for the exercises. Earlier we were using a percentage score on a scale from 0 to 1.
- Renamed the Mode attribute to DeliveryMode in Expert1 and Expert3 due to Mode being a reserved word in SQL.
- Renamed Resource attribute to Material due to Resource being a reserved word in SQL.
- Removed ReceivalDate attribute from Achievement2 and added it to Earns due to inconsistency in the devised ER diagram.
- Changed datatype of TimeLimit in Exercise3 from TIME to INTEGER as it is easier to use for our functions.
- Removed Interacts relation as the SQL server currently in use does not support CASCADE ON DELETE for self-referencing foreign keys.
- Added more INSERT INTO statements.

Note about Constraints

Our original ER diagram contained three participation constraints that could only be captured in our implementation through the use of assertions. Since the project rubric mentioned that assertions need not be implemented for the CPSC 304 project, we did not include them in our final submission nor our initialization script but instead acknowledge their presence below:

- Cannot enforce that every Forum is monitored by at least one Bot (need to create an assertion between Forum4 and Bot_Monitors4);
- Cannot enforce that every Expert specializes in at least one Language (need to create an assertion between Expert4 and Specializes);
- Cannot enforce that every learner learns at least one Language (need to create an assertion between Learner_Consults and Learns).

Final Schema & Screenshots

Language1(LanguageName, NumChars)

```
SQL> SELECT * FROM Language1;
```

LANGUAGENAME	NUMCHARS
English	26
Spanish	27
French	26

33	Teach A Tongue	Learn New languages
34	Contact a LingoXpert	Get in touch with language experts from all over the world
35	Are you speaking Correctly?	Learn all the nuances of the language of your choice

The above two pictures are the Book and Material tables before adding a new study material.

Add Book

Add a book.

MaterialID:

Author:

Here is the user input for the MaterialID and Author of the book they want to add. In this case, the user is adding a book identified by the MaterialID = 1 and the Author named "Someone".

After:

All books offered:

MaterialID	MaterialName	Author
1	Update MaterialName	Someone
11	English in Use	John Doe
12	Spanish Maestro	Gabriel Martinez
13	Elegance in French	Celestine Dior
14	Chinese Stories for Language Learners	Vivian Ling
15	German for Dummies	Paulina Christensen

All study materials offered:

MaterialID	MaterialName	Purpose
11	English in Use	A Self-Study Reference and Practice Book for Intermediate Learners of English with Answers
12	Spanish Maestro	A Self-Study Reference and Practice Book for Intermediate Learners of Spanish with Answers
13	Elegance in French	A Self-Study Reference and Practice Book for Intermediate Learners of French with Answers
14	Chinese Stories for Language Learners	A treasury of proverbs and folktales in Chinese and English
15	German for Dummies	The fun and easy way to learn the fascinating language of German with integrated audio clips!
21	Example Bookstore	Find Your Favorite and Necessary books
22	Example Lingo Fitness App	Can your tongue pronounce correctly?
23	Example Language Learning	Get help to learn new language on your own time
24	Example Pronunciation Platform	Learn the correct pronunciations in over 100 languages
25	Example Forum	Get access to all online forums
31	Multi-Language Dictionary	Get words definitions and translations in over 20 languages
32	How Good is Your Spanish?	Comprehensive Spanish Language Quizzes
33	Teach A Tongue	Learn New languages
34	Contact a LingoXpert	Get in touch with language experts from all over the world
35	Are you speaking Correctly?	Learn all the nuances of the language of your choice
1	Update MaterialName	Update Purpose

After clicking the “Add” button, the book was added to the Book and Material tables as shown by the above two photos. This step corresponds to the INSERT statements from lines 396 and 382, respectively, in the query. The user will need to update the default values set for the MaterialName and Purpose attributes in the Material table though a different function.

DELETE Operation

- **materials.php: lines 512-539**
- **Note:** The same functionality applies to removing apps and websites from the list of study materials.

Before:

All books offered:

MaterialID	MaterialName	Author
1	Update MaterialName	Someone
11	English in Use	John Doe
12	Spanish Maestro	Gabriel Martinez
13	Elegance in French	Celestine Dior
14	Chinese Stories for Language Learners	Vivian Ling
15	German for Dummies	Paulina Christensen

All study materials offered:

MaterialID	MaterialName	Purpose
11	English in Use	A Self-Study Reference and Practice Book for Intermediate Learners of English with Answers
12	Spanish Maestro	A Self-Study Reference and Practice Book for Intermediate Learners of Spanish with Answers
13	Elegance in French	A Self-Study Reference and Practice Book for Intermediate Learners of French with Answers
14	Chinese Stories for Language Learners	A treasury of proverbs and folktales in Chinese and English
15	German for Dummies	The fun and easy way to learn the fascinating language of German with integrated audio clips!
21	Example Bookstore	Find Your Favorite and Necessary books
22	Example Lingo Fitness App	Can your tongue pronounce correctly?
23	Example Language Learning	Get help to learn new language on your own time
24	Example Pronunciation Platform	Learn the correct pronunciations in over 100 languages
25	Example Forum	Get access to all online forums
31	Multi-Language Dictionary	Get words definitions and translations in over 20 languages
32	How Good is Your Spanish?	Comprehensive Spanish Language Quizzes
33	Teach A Tongue	Learn New languages
34	Contact a LingoXpert	Get in touch with language experts from all over the world
35	Are you speaking Correctly?	Learn all the nuances of the language of your choice
1	Update MaterialName	Update Purpose

The above two pictures show the Book and Material tables before removing an existing study material.

Remove Study Material

Input the MaterialID of the study material you wish to remove.

MaterialID:

Here is the user input for removing study materials from the Material table. In this case, the user is trying to remove the study material with MaterialID = 1.

After:

All books offered:

MaterialID	MaterialName	Author
11	English in Use	John Doe
12	Spanish Maestro	Gabriel Martinez
13	Elegance in French	Celestine Dior
14	Chinese Stories for Language Learners	Vivian Ling
15	German for Dummies	Paulina Christensen

All study materials offered:

MaterialID	MaterialName	Purpose
11	English in Use	A Self-Study Reference and Practice Book for Intermediate Learners of English with Answers
12	Spanish Maestro	A Self-Study Reference and Practice Book for Intermediate Learners of Spanish with Answers
13	Elegance in French	A Self-Study Reference and Practice Book for Intermediate Learners of French with Answers
14	Chinese Stories for Language Learners	A treasury of proverbs and folktales in Chinese and English
15	German for Dummies	The fun and easy way to learn the fascinating language of German with integrated audio clips!
21	Example Bookstore	Find Your Favorite and Necessary books
22	Example Lingo Fitness App	Can your tongue pronounce correctly?
23	Example Language Learning	Get help to learn new language on your own time
24	Example Pronunciation Platform	Learn the correct pronunciations in over 100 languages
25	Example Forum	Get access to all online forums
31	Multi-Language Dictionary	Get words definitions and translations in over 20 languages
32	How Good is Your Spanish?	Comprehensive Spanish Language Quizzes
33	Teach A Tongue	Learn New languages
34	Contact a LingoXpert	Get in touch with language experts from all over the world
35	Are you speaking Correctly?	Learn all the nuances of the language of your choice

After clicking the “Delete” button, the book is removed from the Book and Material tables, as seen in the above two pictures. This step corresponds to the DELETE statement from line 528 in the query. Due to the “ON DELETE CASCADE” constraint from lines 198-198 in the SQL file called script.sql, the book was deleted from the Material table and the corresponding tuple was automatically deleted from the Book table as well.

UPDATE Operation

- admin.php: lines 406-455

Before:

Results for viewing Achievement2:

AchievementID	AchievementName	AchievementDescription	RewardID
41	Completionist	Complete all exercises	54
42	Master Speaker	Complete all pronunciation challenges	51
43	Language Pro	Achieve fluency in a language	55
44	Beginner Guru	Complete Beginner Language Requirements	55
45	Bookworm	Read 100 books	53

The picture above shows all the tuples present in the Achievement2 relation.

During:

Update Achievements

Update the achievements offered across the Lingo Exchange system by updating the attributes of tuples in Achievement2. Specify the AchievementID of the tuple you'd like updated and then specify the updated attribute values for that tuple.

Achievement ID:

Attribute Name	Updated Attribute Value
AchievementName	<input type="text"/>
AchievementDescription	<input type="text" value="Completes exercises"/>
RewardID	<input type="text" value="52 (Silver Medal)"/>

The user can then choose to update any number of non-primary key attributes in the Achievement2 relation, with RewardID being a foreign key that references the Achievement1 relation. In the picture above, the user chooses to update the AchievementDescription and RewardID of the achievement with an AchievementID = 41.

After:

Results for viewing Achievement2:

AchievementID	AchievementName	AchievementDescription	RewardID
41	Completionist	Completes exercises	52
42	Master Speaker	Complete all pronunciation challenges	51
43	Language Pro	Achieve fluency in a language	55
44	Beginner Guru	Complete Beginner Language Requirements	55
45	Bookworm	Read 100 books	53

Upon clicking 'Update Achievement' and viewing the tuples in Achievement2, we can see that the update did indeed take place!

Selection Operation

- forums.php: lines 301-346

Before:

View a **filtered** list of existing forums.
Select the attributes you want to filter by specifying the desired attribute value.
Leave the attribute value blank if you do not want to filter by that attribute.

Attribute Name	Attribute Value
URL	<input type="text"/>
Status	<input type="text"/>
Title	<input type="text"/>

Filter Forums

The picture above shows the interface that allows a user to specify any number of filtering conditions for viewing the tuples in the Forum4 relation.

During:

View a **filtered** list of existing forums.
Select the attributes you want to filter by specifying the desired attribute value.
Leave the attribute value blank if you do not want to filter by that attribute.

Attribute Name	Attribute Value
URL	<input type="text"/>
Status	<input type="text" value="Active"/>
Title	<input type="text"/>

Filter Forums

The user can specify the filtering conditions by providing the values for the attributes that they want in the filter (and leaving the attributes that they do not want in the filter blank). In the picture above, we see that the user chooses to filter for forums that are of Status = Active.

After:

Results for viewing filtered forums:

URL	Status	Title
http://example.com/general-discussion	Active	General Discussion
http://example.com/beginner-mandarin-chinese	Active	Beginner Mandarin Chinese
http://example.com/language-learning-book-club	Active	Language Learning Book Club
http://example.com/german-speaking-community	Active	German Speaking Community

Upon clicking 'Filter Forums', the user can view the filtered tuples that satisfy their specified conditions!

Projection Operation

- admin.php: lines 381-404

Before:

Project Attributes

Project the specified attributes for a specific table in the database.
Please provide the desired attribute names as a **comma-separated list**.

Table Name:

Attributes:

The picture above shows the interface that allows a user to choose any number of attributes to view from any relation in the database.

During:

Project Attributes

Project the specified attributes for a specific table in the database.
Please provide the desired attribute names as a **comma-separated list**.

Table Name:

Attributes:

The user must first specify the name of the relation they want to view along with a comma-separated list of attributes they want to view from that relation. Note that we provide the user with the functionality of viewing all the relation names and all the corresponding attributes names for each relation before this 'Project Attributes' functionality. In the above picture, the user chooses to view the ExpertEmail and City attributes from the Expert4 relation.

After:

Results for projecting the specified attributes of EXPERT4:

EXPERTEMAIL	CITY
romina.m@mail.com	Vancouver
annie.w@mail.com	Vancouver
sohbat.s@mail.com	Vancouver
james.w@mail.com	Toronto
kayla.k@mail.com	Toronto
kate.m@mail.com	Edmonton
anita.m@mail.com	Seattle

Upon clicking 'Project Attributes', the user can then view the attributes from their specified relation!

Join Operation

- **home.php: lines 625-639**
- **Note:** Joins all the languages and dialect combinations with the minimum number of characters in each language specified by the user, and displays the result in a table.

Before:

VIEW ALL PROVIDED LANGUAGE NAMES HAVING SPECIFIED MINIMUM NUMBER OF CHARACTERS

Minimum Number of Characters:

Show Languages

During:

VIEW ALL PROVIDED LANGUAGE NAMES HAVING SPECIFIED MINIMUM NUMBER OF CHARACTERS

Minimum Number of Characters:

Show Languages

After:

Retrieved Provided Languages with minimum of 27 Characters:

Language Name	Dialect	Number of Characters
German	Standard German	30
German	Swiss German	30
Spanish	European Spanish	27
Spanish	Latin American Spanish	27

Aggregation with GROUP BY Operation

- `home.php`: lines 681-700
- **Note**: Retrieves the number of achievements of the same reward type/name.

Before:

VIEW NUMBER OF ACHIEVEMENTS EARNED FOR A REWARD

View Achievement Count

After:

Retrieved User's Reward Count:

Reward Name	Number Earned
Certificate of Achievement	1
Initiator	2

Aggregation with HAVING Operation

- **home.php: lines 610-623**
- **Note:** The user is able to specify the minimum number of dialects a language can have in the retrieved output of languages

Before:

VIEW ALL PROVIDED LANGUAGE NAMES HAVING SPECIFIED MINIMUM NUMBER OF DIALECTS

Minimum Number of Dialects:

Show Languages

During:

VIEW ALL PROVIDED LANGUAGE NAMES HAVING SPECIFIED MINIMUM NUMBER OF DIALECTS

Minimum Number of Dialects:

Show Languages

After:

Retrieved Languages with a Minimum of 2 Dialects:

Language Name	Number of Dialects
Chinese	3
English	2
French	4
German	2
Spanish	2

Nested Aggregation with GROUP BY Operation

- exercise.php: lines 589-626

Before:

Count Points Above Average

View all the languages you completed exercises for and calculate the count of exercises which award points above average.

Calculate

This section of the application calculates the number of exercises completed that award points above the average amount of points obtained by all users across all exercises.

After:

LanguageName	CountAboveAverage
Korean	1
English	1
Chinese	1

After clicking the “Calculate” button, the user will see all the languages they have completed exercises for and the count of exercises which award points above average. This corresponds to the nested aggregation with GROUP BY statement from lines 605-617 in the query.

Division Operation

- experts.php: lines 372-384

Before:

View the experts who specialize in all the languages offered across our platform.

View Specialized Experts

After:

Results for viewing specialized experts:

ExpertEmail	ExpertName
kate.m@mail.com	Kate M
anita.m@mail.com	Anita M

The pictures above highlight how the user can view all the experts who specialize in every language offered across the Lingo Exchange platform.

Basic Error Handling

- We include some of our basic error handling operations below.
 - Message 1 - **materials.php**: lines **396-400, 435-439, 474-478**
 - Message 2 - **forums.php**: lines **352-354**.
 - Message 3 - **materials.php**: lines **498-509, 527-238**
 - Message 4 - **exercise.php**: lines **460-473, 507-518**

ERROR: Check that the MaterialID is correct (it shouldn't exist in the list of resources)

ERROR: You must specify a valid Forum URL to join.

This MaterialID doesn't exist :(Check the list of Materials for the correct ID.

There are no questions for this exercise name and number :(Check the exercise name and number again.

Basic User Notification

- We include some of our user notifications (for completing an UPDATE, INSERT, or DELETE operations) below.
 - Notification 1 - **forums.php**: lines **399-402 (DELETE operation)**
 - Notification 2 - **admin.php**: lines **447-453 (UPDATE operation)**
 - Notification 3 - **materials.php**: line **396-400 (INSERT operation)**

SUCCESS: You successfully left a forum (if you had joined it to begin with) :)

SUCCESS: The attributes of the specified achievement (if it existed) have been updated in Achievement2 :)

SUCCESS: Added a new book :)

Basic Security Practices

- Our application is secure against malicious SQL injections, as demonstrated by the example below :)

Join a Forum

Join an existing forum!

Forum URL:

ERROR: We encountered a problem when trying to add you to a forum :(Make sure that you've entered a valid User ID (which should be an integer) and the URL to an *existing* Forum that you haven't already joined (use our view forums functionality to see what's available).
